

The VNR Recycler from MEI: Changing the game at the point of sale

High-Visibility Bezel option
strokes through a wide
range of colors

MEI CASHFLOW[®]
VNR Vending Recycler

A game-changer for operators:

- Bills that come in as payment are used for change going out
- Minimizes expensive coin float
- Stores up to 30 bills – \$1 or \$5
- Accepts all notes between \$1 and \$20 – consumers can pay with whatever denominations are in their pockets
- Compact, modular design enables placement in a variety of machine types
- A selection of bezel types to meet all location and POS needs
- Eliminates the need for bill changers
- MEI CASHFLOW technology – for reliability and quality that positively impacts the bottom line

A game-changer for consumers:

- Unique MEI bezels – with LED and credit card options – provide an interactive and informational vending experience
- Know in real time what denominations are being accepted and confirmed on the LED HVB bezel
- Gives change in bills versus coins – matching the retail experience
- MEI CASHFLOW technology – for an easy and reliable purchase every time

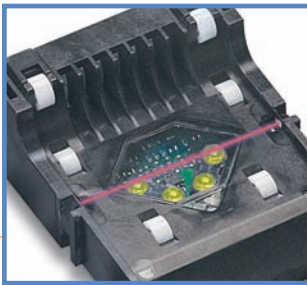

MEI CASHFLOW 3-in-1 bezel
for recyclers

MEI CASHFLOW VNR Vending Recycler

Make your business more accurate, flexible, easier to manage and, ultimately, more profitable.

Here's how:

Accuracy you can count on

Unique to the industry, sensors inside the MEI VNR Recycler module detect when the unit has been opened. Once closed, the module will recalibrate, accounting for any change to the bill level on the recycler,

improving cash accuracy in the machine. High acceptance rates coupled with accurate bill recognition are ensured through the validator's fully enclosed optical sensors.

A solution that meets your needs – today and tomorrow

Selecting an MEI VNR Recycler is just the beginning: with customization options, you can tailor its feature sets to your business. Add a VNR Recycler module to your MEI validator at any time. Or, as locations require, customize your VNR Recycler with one of the many CASHBOX and BEZEL OPTIONS available to you.

MEI Payment Systems

Your point of difference at the point of sale.

Manage your routes with ease

Operations have never been easier than with the VNR Recycler. Upgrade and program your VN2700 with the Recycler module, **right in the field**. Smart diagnostics featuring a two character display allow drivers to troubleshoot while on their routes. For in-field fixes, the bill path is conveniently accessible. Compatibility with all MDB coin mechs allows for the flexibility to match location needs with your change fund strategy.

A profitable difference at the point of sale

By providing a consumer-friendly alternative to a coin-only change return and encouraging a multi-vend scenario by accepting higher denominational bills, recyclers can increase sales by as much as **15%**. The MEI VNR Recycler's **98%** acceptance turns performance into profit. Payment choices – including coupons – keep consumers coming back for repeat/bonus visits.

With over 3 million MEI Validators in the field today, look to the proven performance and reliability of MEI CASHFLOW devices to minimize expensive service calls and maximize profits.

Product Specs at a Glance

Power Consumption

- Acceptance: 15 Watts
- Operating Environment – 15°C – 60°C

Power Sources

- 22 to 45 VDC

Interface

- MDB

Bill insertion

- 4 Way
